#### ICU Medical Announces Second Quarter 2023 Results and Narrows Fiscal Year 2023 Guidance Ranges

SAN CLEMENTE, Calif., August 7, 2023 (GLOBE NEWSWIRE) -- ICU Medical, Inc. (Nasdaq:ICUI), a leader in the development, manufacture and sale of innovative medical products, today announced financial results for the quarter ended June 30, 2023.

#### Second Quarter 2023 Results

Second quarter 2023 revenue was \$549.3 million, compared to \$561.0 million in the same period last year. GAAP gross profit for the second quarter of 2023 was \$192.3 million, as compared to \$167.6 million in the same period last year. GAAP gross margin for the second quarter of 2023 was 35%, as compared to 30% in the same period last year. GAAP net loss for the second quarter of 2023 was \$(9.9) million, or \$(0.41) per diluted share, as compared to GAAP net loss of \$(7.5) million, or \$(0.31) per diluted share, for the second quarter of 2022. Adjusted diluted earnings per share for the second quarter of 2023 was \$1.88 as compared to \$1.37 for the second quarter of 2022. Also, adjusted EBITDA was \$98.1 million for the second quarter of 2023 as compared to \$84.7 million for the second quarter of 2022.

Adjusted EBITDA and adjusted diluted earnings per share are measures calculated and presented on the basis of methodologies other than in accordance with GAAP. Please refer to the Use of Non-GAAP Financial Information following the financial statements herein for further discussion and reconciliations of these measures to GAAP measures.

Vivek Jain, ICU Medical's Chief Executive Officer, said, "Second quarter results were generally consistent with our expectations, with growth in most large product families except Vascular Access and IV Solutions."

#### **Use of Non-GAAP Financial Information**

This press release contains financial measures that are not calculated in accordance with U.S. generally accepted accounting principles ("GAAP"). The non-GAAP financial measures should be considered supplemental to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. There are material limitations in using these non-GAAP financial measures because they are not prepared in accordance with GAAP and may not be comparable to similarly titled non-GAAP financial measures used by other companies, including peer companies. Our management believes that the non-GAAP data provides useful supplemental information to management and investors regarding our performance and facilitates a more meaningful comparison of results of operations between current and prior periods. We use non-GAAP financial measures in addition to and in conjunction with GAAP financial measures to analyze and assess the overall performance of our business, in making financial, operating and planning decisions, and in determining executive incentive compensation.

The non-GAAP financial measures include adjusted EBITDA, adjusted revenue, adjusted gross profit, adjusted selling, general and administrative, adjusted research and development, adjusted restructuring, strategic transaction and integration, adjusted change in fair value of contingent earn-out, adjusted income from operations, adjusted other expense, net, adjusted (loss) income before income taxes, adjusted benefit (provision) for income taxes, adjusted net (loss) income and adjusted diluted (loss) earnings per share, all of which exclude special items because they are highly variable or unusual and impact year-over-year comparisons.

For the three months ended June 30, 2023 and 2022, special items include the following:

<u>Stock compensation expense</u>: Stock-based compensation is generally fixed at the time the stock-based instrument is granted and amortized over a period of several years. The value of stock options is determined using a complex formula that incorporates factors, such as market volatility, that are beyond our control. The value of our restricted stock awards is determined using the grant date stock price, which may not be indicative of our operational performance over the expense period. Additionally, in order to establish the fair value of performance-based stock awards, which are currently an element of our ongoing stock-based compensation, we are required to apply judgment to estimate the probability of the extent to which performance objectives will be achieved. Based on the above factors, we believe it is useful to exclude stock-based compensation in order to better understand our operating performance.

<u>Intangible asset amortization expense</u>: We do not acquire businesses or capitalize certain patent costs on a predictable cycle. The amount of purchase price allocated to intangible assets and the term of amortization can vary significantly and are unique to each acquisition. Capitalized patent costs can vary significantly based on our current level of development activities. We believe that excluding amortization of intangible assets provides the users of our financial statements with a consistent basis for comparison across accounting periods.

<u>Restructuring</u>, <u>strategic transaction and integration</u>: We incur restructuring and strategic transaction charges that result from events, which arise from unforeseen circumstances and/or often occur outside of the ordinary course of our ongoing business. Although these events are reflected in our GAAP financial statements, these unique transactions may limit the comparability of our ongoing operations with prior and future periods.

<u>Change in fair value of contingent earn-out</u>: We exclude the impact of certain amounts recorded in connection with business combinations. We exclude items that are either non-cash or not normal, recurring operating expenses due to their nature, variability of amounts, and lack of predictability as to occurrence and/or timing.

<u>Adjustment to reverse the cost recognition related to the purchase accounting write-up of inventory to fair market value</u>: The inventory step-up represents the expense recognition of fair value adjustments in excess of the historical cost basis of inventory obtained through acquisition, these charges are outside of our normal operations and are excluded.

<u>Quality system and product-related remediation</u>: We exclude certain quality system product-related remediation charges in determining our non-GAAP financial measures as they may limit the comparability of our ongoing operations with prior and future periods and distort the evaluation of our normal operating performance.

<u>Disposition/write-off of certain assets</u>: Occasionally, we may sell/write-off certain assets. We exclude the non-cash gain/loss on the disposition/write-off of these assets in determining our non-GAAP financial measures as they may limit the comparability of our ongoing operations with prior and future periods and distort the evaluation of our normal operating performance.

From time to time in the future, there may be other items that we may exclude if we believe that doing so is consistent with the goal of providing useful information to investors and management.

In addition to the above special items, Adjusted EBITDA additionally excludes the following items from net income:

*Depreciation expense*: We exclude depreciation expense in deriving adjusted EBITDA because companies utilize productive assets of different ages and the depreciable lives can vary significantly resulting in considerable variability in depreciation expense among companies.

*Interest, net*: We exclude interest in deriving adjusted EBITDA as interest can vary significantly among companies depending on a company's level of income generating instruments and/or level of debt.

*Taxes*: We exclude taxes in deriving adjusted EBITDA as taxes are deemed to be non-core to the business and may limit the comparability of our ongoing operations with prior and future periods and distort the evaluation of our normal operating performance.

We also present Free cash flow as a non-GAAP financial measure as management believes that this is an important measure for use in evaluating overall company financial performance as it measures our ability to generate additional cash flow from business operations. Free cash flow should be considered in addition to, rather than as a substitute for, net income as a measure of our performance or net cash (used in) provided by operating activities as a measure of our liquidity. Additionally, our definition of free cash flow is limited and does not represent residual cash flows available for discretionary expenditures due to the fact that the measure does not deduct the payments required for debt service and other obligations or payments made for business acquisitions. Therefore, we believe it is important to view free cash flow as supplemental to our entire statement of cash flows.

The following tables reconcile our GAAP and non-GAAP financial measures:
